Subject: Columbia response to 8/13/2015 EPA request

Dear Tom and Kacee,

On behalf of Ricky Perera and the Columbia Center for Children's Environmental Health, our response to the August 13 EPA request is attached, along with copies of Center papers that provide methodological information and relevant results for TCPY. The response document includes a copy of the original request, the text of our response, and tables showing the distribution of cord and maternal chlorpyrifos, based on all available data from our New York City cohort.

We appreciate your offer to expedite a service contract to support responses to requests like this one, and look forward to hearing from the EPA business office about establishing this mechanism.

Regards,

Howard
